

Research Update 04-11-21

A Startling New Game Changer!

The name of Yehovah has been found in the Epistle(s) of Peter from the British Museum. There is now a pattern of evidence ever more widespread of the sacred name being used in the Hebrew Gospels and Epistles of the Brit Hadashah only now being translated. It is no coincidence that the Epistles – those originally written in Hebrew – are all placed at the back of the bus, so to speak. That is to say, the N.T. Epistles known to be from Hebrew are all placed at the end of the N.T.

They are:

- Hebrews,
- James (Jacob in Hebrew),
- 1st & 2nd Peter,
- 1st, 2nd & 3rd John,
- Jude and
- Revelation.

This cannot be a coincidence. This had to be a conscious choice committed by the Christian Church hierarchy. Martin Luther, to give one example, was forcibly against including James & Revelation in the Protestant Bible. Their translation promises some incredible revelation! Remember we not only have the British Museum manuscripts but two manuscripts of the entire Brit Hadashah from Cochin, India.

Their comparison and compilation will reveal much about their authenticity and the original wording. Here are the names typically taken out of the New Testament by translation: Yehovah, Yeshua, Torah, Menorah, Aleph-Tav. Our research is showing these words are indeed used in various manuscripts of The Hebrew Gospels and Brit Hadashah. They will be in the authentic version we are compiling!

The above content is the meat of Miles Jones' 7-page 04-11-21 research update Newsletter. (Most of the rest of the newsletter is repeat material from what we have previously posted.)

I have posted this summary on www.bibleconcepts.com for your convenience.

Dr. Miles Jones is an avid truth-seeker, continuing to use the best, most-accurate sources to translate the Gospels (originally written in Hebrew), into English.

He will soon have the English translation of the entire New/Renewed Covenant.
